

Today is the day I went down the mine  
There was good feeling in the air and the weather was fine  
We made our way down to rocks and dust  
To where evil men dig towards the earth's crust  
Where the orchestra played and caused quite a sensation  
Police and security mobilized in force  
But we were not scared, they did not push us off course  
'Cos we are the good guys and they are the bad  
And they do for money would make anyone sad  
But today I'm not down, the group gives me power  
'Cos we've stopped there destruction for a few hours  
In these hours that pass us by  
Things can live that would otherwise die  
Like trees and plants and peoples souls  
Which are in constant threat when we dig big holes
